HANKINS J H = Dominion Parks Branch December 1918 (081)

MYL.

43

DEPARTMENT OF THE INTERIOR
CANADA

Dominion Parks Branch,
Ottawa, December 2nd, 1918.

Dear Sir:-

Dr. Ruttan of McGill University gave me the names of two men of the Physics Department of Toronto University, Mr. John Satterley and Major Eve, as being authorities on radium.

I understand that both Mr. Satterley and Major Eve have been serving overseas and, as this Branch is proposing making certain investigations in connection with radium, I would be very much obliged to you if you would let me know whether you have any information regarding their return to Canada. If there is a probability of their being retained on the other side for some time and you would let me know their units, I would be able to write to them direct, before they come back.

With many thanks in anticipation of your trouble in this matter,

Yours faithfully,

J B Harkin

Commissioner.

The President,
University of Toronto,
Toronto, Ontario.

December 10th, 1918

J. B. Tanklin, Esq.,

Decimion Forest Branch,

Ottawa, Ont.

Dear Sir:

Professor John Satterly has not been overseas and is now an active member of our staff in the University, and I should think that he would be able to undertake investigations which did not involve his absence from his professorial work in Toronto during the session.

Yours sincerely,

President.
